

PROJECT EXPERIENCE: BIOPHARMACEUTICALS /BIOTECHNOLOGY

Name: Biomarin BGEX

Location: Novato, CA USA

Owner: Biomarin

Project Services

Kinetics installed process piping for new purification, filtration, media prep, cell culture, and buffer prep areas and also completed extensive utility work for a new waste neutralization system (acid transfer lines, caustic transfer lines, CIP100/200).

Other installed piping systems included: Process Transfer Lines, Ambient/Hot WFI, CIPS/R, Pure Steam, Pure Steam Condensate, Process Drain, RODI, and Utility Gas (CO₂, O₂, CDA, N₂). It's worth noting that other areas of the building and the existing utility yard remained operable while new work was being constructed.
